

# Project Execution Steps: Nyay Saathi

**Team:** G-12

**Project:** Nyay Saathi - AI Legal Case Advisor for Citizens

## 1. Prerequisites

Ensure the following are installed on your system before proceeding:

- **Node.js** (v16+) or **Bun**
- **Python** (3.9+)
- **Git**

## 2. Frontend Execution Setup

1. Open a terminal and navigate to the main project directory:

```
cd citizen-legal-buddy-main
```

2. Install the required NPM dependencies:

```
npm install
```

3. Start the Vite frontend development server:

```
npm run dev
```

4. The frontend application will now be running at: <http://localhost:5173>

## 3. Backend Execution Setup

1. Open a second terminal and navigate to the backend directory:

```
cd citizen-legal-buddy-main/backend
```

2. Create and activate a Python virtual environment:

```
python -m venv .venv  
.venv\Scripts\activate
```

3. Install the required Python packages:

```
pip install -r requirements.txt
```

4. Create a `.env` file in the `backend/` folder and add your Gemini API key:

```
GEMINI_API_KEY=your_api_key_here
```

5. Start the FastAPI backend server:

```
python main.py
```

6. The backend API will now be running at: <http://localhost:8001>

## 4. System Verification

- **Frontend Check:** Open `http://localhost:5173` in your browser to verify the UI loads.
- **Backend Check:** Open `http://localhost:8001/docs` to view the FastAPI Swagger documentation.
- **Integration Check:** Navigate to the AI Chat feature on the frontend and send a test query to verify the end-to-end connection with the backend and Gemini API.
